

ACP Quick Start Guide

ACP Quick Start

This section provides a high-level overview to familiarize you with the basics of ACP.

- [Before You Begin](#)
- [UI Overview](#)
- [Quick-Start Tutorial 1](#)
- [Quick-Start Tutorial 2](#)

Quick Start Pages by Function

Reference & Preparation

- **Before you Begin** - Provides a list of items to consider when first using ACP, as well as reference links for supported connector services and their API documentation.

Page Overviews

- **UI Overview** - Provides a high-level overview of all major pages in ACP, navigation, and basic tasks.

Tutorials

- **Quick-Start Tutorial 1** - A step-by-step basic introduction to creating a workflow with a single step. This tutorial covers:
 - Login
 - Creating a new Workflow
 - Configuring a Connector
 - Adding a Step
 - Basic Step Configuration for Input / Output
 - Basic Execute / Results View
 - Basic Debug Mode
- **Quick-Start Tutorial 2** - A step-by-step intermediate introduction to creating workflow with advanced options and conditions. Tutorial 2 is a continuation of Tutorial 1. This tutorial covers:
 - Editing Step Inputs
 - Executing a Workflow with User-Given Variables
 - Creating / Linking Multiple Steps
 - Basic / Intermediate Conditions
 - Formatting Output
 - Verifying Condition Routing
 - Reviewing Debug Mode

If you are already familiar with the basics of ACP, you may want to review the [ACP User Guide](#) instead.
