Import Aggregate Blocks

Import Aggregates

Importing blocks from your RIR source IP is available from the Data Import Tab in the Admin area of ProVision. This feature uses the RIR Org ID to identify a source IP and determine blocks assigned to your organization that are available for import.

Data Import Import Tools Information on preparing data for import and using each import tool is available at https://docs.6connect.com/display/DOC/Importing+Your+Data. Sample import templates are available here.  - Step 1: Lookup from Source IP
 - O Step 2: Import your aggregate blocks
 - Step 3: Customizing Block Data
- Additional Information

Import from RIR

From the Data Import Tab, select "Import from RIR" under "IP Import".

Import Tools Information on preparing data for import and using each import tool is available at https://docs.6connect.com/display/DOC/Importing+Your+Data. Sample import templates are available here. Step 1: Lookup from Source IP

We automatically lookup your ARIN or RIPE information based on the IP address you are connected to:

If you have another source IP that you would like to use for the lookup function, you can edit the IP and click on the "Inquire Again" button. If the organization name and ORGID are correct, then click on the "Confirm" button to go to the next screen.

Step 2: Import your aggregate blocks

Once we have identified the blocks assigned to your company, you can import the aggregates by pressing the "Add Aggregate" buttons.

This page allows you to add both 1918 aggregates as well as public IP space from ARIN and RIPE.

When done adding aggregates, hit the "Continue to ProVision" button at the bottom of the page.

Continue to ProVision.

You will be redirected to the IPAM tab to manage the aggregates as desired.

Step 3: Customizing Block Data

With your aggregates added, you are now ready to customize the tool and import additional data! From here, you can manage your aggregates under the IPAM tab, edit administration functions under IPAM Admin, or import resources using the Resource Import Tool.
