

Resource Importer Walkthrough - Step 4

Importing Resources

Step 4: Edit data as needed

As you may have noticed in Step 3, with this example we have a couple of columns that don't quite match up to the Section Grid. The "Title" column in the .csv data is an additional column we are not tracking in our Section. Also, although we have a "First Name" and "Last Name", we are missing a data column for the top-level "Name" required in the Section Grid.

Common Editing Questions:

- What if I have too many / too few columns in my .csv to match the Section Grid?
- What if I see a typo in the .csv data?
- What if just my column headers are in the wrong place?

To Hide Extraneous Column Information:

Right click on a header and deselect the check box for the column you wish to hide. In this case, we want to hide "Title".

#	Unique ID	First Name	Last Name	email	Phone

To Edit Data in the Resource Importer

Data in the grids can be edited directly by clicking on the cell(s). In our example, we can see that "Amanda Kingston" should really be "Amanda Kingston". Let's fix that! Click in the cell, type in the edit you wish to make, and then click outside of the cell to exit edit mode. To edit a full row of data, you can right click on the row, select "Edit" row, and make multiple changes in the form box.

#	<input type="checkbox"/>	Unique ID	First Name	Last Name	email	email2	Phone
0	<input type="checkbox"/>	6c-004	Aaron	Hughes	aaron@gmail.com	support@gmail.com	1-408-555-1212
1	<input type="checkbox"/>	6c-004	John	Parker	john@gmail.com		234.634.1234
2	<input type="checkbox"/>	6c-004	Tom	Taylor	ttaylor@toms.com		503-555-1256

11	<input checked="" type="checkbox"/>	6c-015	Amanda	Kingston	akingston@sellin...		44 123 555 12

If a column header is over the wrong data:

If just the header is in the wrong spot (doesn't match the data below it), you can move just the column header in the Resource Importer, without moving the data below it.

1) Right click on a row of the grid to edit and select "Set Columns":

2) In the "Change Column Header" dialog box, drag and drop the column header(s) into the desired order. Remember, this only moves the headers, not the data below them! Then, hit "OK".

Change Column Header

If your .csv data is missing a data column needed for the Section grid:

In our case, the .csv data is missing the required "Name" column for the Section grid. Think of the "Name" as the information you would want to search for in Provision. We wouldn't want to search just for "Bob" or "Smith" when looking down a list of names, so under the "Name" column, we need to see the full first and last names, like "Bob Smith".

Currently, our options to fix this are:

1) Edit the .csv directly in your spreadsheet program: (Recommended) Simply revise the .csv to include another column for "Name", and re-open the .csv in the importer. The benefit to this method is your .csv file will be set up as a template for future imports.

Or:

2) In the Resource Importer, temporarily hide the extra column in the Section Grid: Make the columns between the .csv and the Section Grid match exactly by temporarily [hiding the column](#) (in this case, "Name") in the Section Grid, proceed to move the data into the Section grid (see Step 5), then unhide the "Name" column and manually add the data as needed prior to completing the import.
