ProVision 6.0.2

ProVision 6.0.2 is a minor release with bug fixes.

Bug Fixes/Improvements

IM - 2635: Resolved an issue where the DNS Autogenerator Gadget would show a "The forward zone doesn't exist" message after an initial run.

IM - 2636: Updated KEXINIT handling in Peering configuration pushes.

IM - 2638: Resolved an issue in DNSv3 where editing a zone record would respond with a "host/value already exists" error if skip validation was not checked.
