Resource Import from CSV

Simple Upload / Import from CSV

The <u>Simple Upload / Import from CSV</u> tool is used if you have a simple .csv file with customer / contact information, such as Name, Address, Billing Address, Phone numbers, POC, etc. It is accessed from the **Data Import Tab** from the **Admin** section.

Data Import

Peering Import	Route53 Zone Import
Import BGP Sessions	

To import your customer / contact information, follow the following steps:

- Before you Begin: Prepare your Data for Import
- Step 1: Create a new Resource / Customer Import Job
- Step 2: Define Columns
- Step 3: Reviewing Data
- Additional Information

Before you Begin: Prepare your Data for Import

The Simple Upload / Import from CSV tool requires only a .csv file for importing.

Be sure to review "Preparing Data for Import" on the Importing your Data page before you begin. Verify that your .csv is correctly parsed and cleanly formatted with your customer/contact information (using your choice of the available field list shown below), and is UTF-8 encoded for best results.

Be sure to check that your data is cleaned up with the following steps:

- Remove any empty rows in the data range
- Remove any empty columns in the data range
- Remove stray data from inside and outside the data range, such as:
 - notes, comments, and placeholder text as field values, when not set as their own data column
 - nested secondary information located in additional rows under a primary record
- Ensure proper data formatting
 - Check for data formatting errors a common issue is leading zeros being dropped from a ZIP field when a file is opened. Respecify format as needed.
 - Ensure each field has consistent formatting for values
- Ensure unique values for primary identifiers, such as Resource Name and ID Fields

Data Encoding Format

To ensure correct importing of any special characters, make sure to use UTF-8 encoding for your CSV file!

This Resource Import from .csv tool supports the following fields:

 ✓	•
	Billing Street 1
	Billing Street 2
	Billing City
	Billing State
	Billing Zip
	Billing Country
	Custom Field
	Customer Id
	Email 1
	Email 2
4	Mail Street 1
	Mail Street 2
F	Mail City
1	Mail State
	Mail Zip -
1	Mail Country
	Name
	Net POC
(Org Id
	Org POC
	Origin ASN =
(Phone
	Fax
-	

Г

Note: the following fields are REQUIRED:

- Name (Unique Resource / Customer Name)
- Customer ID (Unique non-name identifier)

All other fields are optional.

Note: Resource Import from .csv currently only supports the columns above. For importing additional data, please see the Resource Import Tool, or contact support for details on import services.

Step 1: Create a new Resource / Customer Import Job

Navigate to the Data Import Tab from the Admin button. Select "Simple Upload / Import from CSV" under "Resource Import".

Import Tools	
Information on preparing data for import and using each Sample import templates are available here.	n import tool is available at https://docs.6connect.com/display/DOC/Importing+Your+Data.
Resource Import:	DNS Import:
Simple Upload/Import from CSV	BIND Zone Upload/Import
Resource Import Tool *Beta*	PowerDNS Zone Import
IP Import:	InfoBlox Zone Import
Upload/Import from CSV	NS One Zone Import
Import from RIR	Dyn DNS Zone Import
	DNSMadeEasy Zone Import
Peering Import	Route53 Zone Import
Import BGP Sessions	IPPIan Zone Import

Create a Job Name and Description for the import. This is especially useful to keep track of progress in cases the data arrives from multiple sources, or will require multiple stages of manual review.

Select the .csv file that you prepared above by selecting the "Choose File" button, and browsing to the correct file location. Then hit "Start Import".

Customer Import
Clear
Step 1: New Import
The Customer Import accepts CSV files in a variety of configurations and formats. For an example file, click here. Please make sure all data files are encoded with UTF-8 for best results.
Job Name:
Test 1
Description:
Input File:
Choose File No file chosen
File must be in CSV Format.
Start Import

Working with Large or Multiple Data Sets

Although you cannot add new files to an existing job, for jobs with multiple sources for data (which may have different formatting), you can simply create separate jobs and descriptions for each source - no need to manually combine the data into one file before importing. The Import tool's mapping and editing functions will allow for the data to be reconciled in ProVision.

For large data sets where multiple stages of manual review might be needed, you can create a new job using the same set of data files in order to work in parallel on a different portion of the data.

After importing, the new job will appear under the "Existing Jobs" section.

To continue working with this job, select it from the list (by clicking on the link) and the next step ("Define Columns") will appear at the bottom of the page.

Existing Jobs						
Test 1 last modifie	ed 12-08-2021 3:01 PM					Delete
Test 2 last modifie	ed 04-11-2021 1:23 PM					Delete

Step 2: Define (Columns					
		the function of the c	olumns in the provided	d CSV. The 'Customer Id' field i	s your internal customer ident	ification system and can be
referenced elsewher	re.					
	•	•	Ŧ	•	•	
Unique ID	Name	Phon	e	Phone 2	Mail_street_1	Mail_street_2
101	Oregano	408-5	55-2341		55 Pizza Ave.	#340
102	Basil	408-5	55-2341	408-555-1774	367 Maple Ave	
103	Thyme	756-3	44-3241		123 State St.	
4						•
						Next

Step 2: Define Columns

Using the dropdown menu above each data field, select the appropriate definition for each of the imported columns. **Phone** and **Fax** may have multiple columns associated with the data. Other columns which do not apply under the available definitions should be left as blank, and will be skipped during the upload process.

Note: the following fields are REQUIRED:

- Name (Unique Resource / Customer Name)
- Customer ID (Unique non-name identifier)

Make sure that you have defined all desired fields by using the scroll bar below your data to view additional columns.

When completed, hit "Next".

eferenced elsewhere.					
Customer Id 💌	Name 💌	Phone •		•	
Unique ID	Name	Phone	l	Mail_street_1	Mail_street_2
101	Oregano	408-555-2341	Billing Street 1	55 Pizza Ave.	#340
102	Basil	408-555-2341	Billing Street 2	367 Maple Ave	
103	Thyme	756-344-3241	Billing City	123 State St.	
4	_		Billing State		•
•			Billing Zip		_
			Billing Country Custom Field		Nex

Step 3: Reviewing Data

After supplying the file and defining columns, a review step is provided. Records with errors will show as color coded, and can be filtered to be viewed by All, Valid, Warnings, Invalid, or Ignored.

From here, the records can be edited or ignored. Select "Ignore" for records that you do not wish to import at this time. Records that are Ignored or Invalid will automatically be skipped.

Header Rows

If your .csv has a header row as the first line, that row will be shown as the first record in review data as well. Simply click "Ignore" on the first record to disregard the row.

For rows with an "Invalid" or "Warning" status, you may wish to edit the record to change information to a valid option.

Step 3: Review Data		
Please review the data for correctness	s. Invalid and ignored rows will be skipped.	
View: All Valid Wa	arnings Invalid Ignored	Hide
Name		Enable
Oregano	A customer already exists with this name!	Edit Ignore
Basil		Edit Ignore
Thyme		Edit Ignore

Hitting the "Edit" button for the record provides options to change or add information for available fields.

Step 3: Reviev	v Data			
Please review the	data for correctness. Invalid and ignore	ed rows will be skip	oped.	
View: All	Valid Warnings Inva	alid Ignored	i	Hide
Name				Enable
Name:	Oregano 2 ┥			View Save
Customer Id:	101	Custom Field:	1234	
Phone:		Fax:		
Email 1:		Email 2:		
Mail Street 1:	55 Pizza Ave.	Mail Street 2:	#340	
Mail City:	San Jose	Mail State:	CA	
Mail Zip:	95124	Mail Country:	US	
Billing Street 1:	124 Flagle St.	Billing Street 2:	#341	
Billing City:	San Jose	Billing State:	CA	
Billing Zip:	95125	Billing Country:	US	
Net POC:	AAH2-ARIN	Org Id:	ORG	
Org POC:	AAHw-ARIN	Origin A SN:	23341	
Basil				Edit Ignore
Thyme				Edit Ignore

In this example, as "Name" was the invalid field, it has been updated to a unique value. The "Custom Field" value has been added as well.

After making the desired edits, hit "Save".

The data record will be re-checked for validity, and will have a white background if it is now valid for import.

Step 3: Review Data		
Please review the data for correctness. Invalid and ignored rows will be skipped.		
View: All Valid Warnings Invalid Ignored		Hide
Name		Enable
Oregano 2	Edit	Ignore
Basil	Edit	Ignore
Thyme	Edit	Ignore
Step 4: Import Data		
When you have reviewed the data import job for accuracy, hit the Execute Import button. All rows which are disabled, invalid, have warnings, or were previously passed over. Successful import rows will be marked as such.	success	ful will be
	Exe	cute Import

After data has been reviewed for accuracy, you may execute the import.

Step 4: Execute Import

When the review step is completed, hit the "Execute Import" button.

Step 3: Review	N Data data for correctness. Ir	and ignored row	s will be skinner	d													
View: All	Valid Warni		Ignored												(Hide	
Name																Enable	
Oregano 2															Edit	Ignore	
Basil											i.		i.		Edit	Ignore	
Thyme															Edit	Ignore	D
Step 4: Import	Data																
	eviewed the data import cessful import rows will	-	e Execute Impo	ort butt	tton. A	All row	ws whic	ch are d	lisabled	l, invalid	, have wa	nings, or	were prev	viously s		sful will b ecute Impo	-

A progress bar will appear to and display the records as they are imported.

When the bar reaches 100%, and displays "Current Step: Finished!" the import is complete, and you may leave the page.

Step 4: Import Data	
When you have reviewed the data import job for accuracy, hit the Execute Import button. All rows which are disabled, invalid, have warnings, or were previously successful will be passed over. Successful import rows will be marked as such.	
Execute Import	
Current Step: Finished!
