

Contact Manager

Contacts

View the Contacts List by clicking "Contacts" from the [Resource](#) Tab, or from the Resource Tab dropdown menu, under "Contacts". The Contacts List displays existing contacts and provides options to import new contacts. You can create new contacts manually, or import contacts from RIR. Contacts may then be assigned to resources through the Contacts Gadget.

Working with Contacts

View Contact Details

To view the contact details, click on the contact's name in the Resource Contact List. You will be taken to the contact details page.

A local contact will have modules shown for Address, Email/Phone, and Comments, as well as a list of any resources that contact is assigned to via the Contacts Gadget.

You may edit or delete a Local contact by clicking the "Edit" button at the bottom of the page.

Create

When done filling out the information fields, hit the "Create" button to save your contact.

Parent

The parent field relates the contact to a resource's permissions structure, only allowing users with permissions for that resource to view and assign the affiliated contact(s). To allow the contact to be viewed globally, check the "Global Contact" box above the Parent Field.

Import Contact from RIR

To import a contact from ARIN or RIPE, click the "Import from RIR" button from the contacts page.

1) Select RIR / Type

Once on the the Import from RIR page, on the left hand side of the page select the RIR from which you wish to import - ARIN or RIPE.

Select RIR

ARIN

Search ARIN

Enter Point of Contact handle...

Search

If you select RIPE, you will also be prompted to choose whether you are importing a "Person" or "Role".

Select RIR

RIPE

Select Type

Person

Search RIPE

Enter Point of Contact handle...

Search

2) Enter Point of Contact Handle

After selecting the RIR / Type (if applicable), enter the ARIN or RIPE Point of Contact Handle for the contact you are importing, then click "Search".

Point of Contact Handle is the only search term that is valid. Attempting to search by name or keyword is not valid, and will return an error.

Select RIR

RIPE

Select Type

Role

Search RIPE

GOOG2-RIPE

Search

3) Verify and Add

If the search is successful, the found contact information will display at the bottom of the screen. If this is the information you wish to add, click the "Yes" button on the right hand side of the page under "Would you like to add this RIPE contact?". Otherwise, you may hit "No" to decline adding, or cancel and return to the index.

The screenshot shows a web interface for searching RIPE contacts. On the left, there are dropdowns for 'Select RIR' (set to RIPE) and 'Select Type' (set to Role). In the center, the 'Search RIPE' box contains 'GOOG2-RIPE' and a 'Search' button. On the right, a 'Correct result?' dialog asks 'Would you like to add this RIPE contact to 6Connect?'. It has 'No' and 'Yes' buttons, with 'Yes' highlighted in green and circled in red. Below the dialog is a link 'Cancel and return to index'. At the bottom, a 'Results' section displays contact details: role: Google Corp Network, address: Brandschenkestrasse 110, Zurich 8002, Switzerland, nic-hdl: GOOG2-RIPE, and mnt-by: MNT-GOOG-CORP.

Import Contact from LDAP

Import LDAP Contact requires that an LDAP authentication server is enabled and setup in [Admin Settings](#), and access credentials to be provided prior to import.

First, ensure that the LDAP authentication server is enabled and setup in [Admin Settings](#), and access credentials provided.

Then, from the Resource Tab **Contacts List**, click the "Import from LDAP" button at the top of the list.

The screenshot shows the 'Resource list' interface. At the top, there are tabs for 'Contacts', 'export', 'Import from RIR', 'Import from LDAP' (circled in red), and 'show filters +'. Below the tabs is a table with columns: Id, Slug, Name, Parent Id, Parent Name, Category Id, Category Name, Created, and Modified. Two rows of contact data are visible.

Use the search box to find an LDAP contact and click the "Import Contact" button.

The screenshot shows the 'Import Contact from LDAP' dialog. It features a search box labeled 'Search for LDAP Contact' with a red arrow pointing to it. To the right of the search box is an 'Import contact' button, which is circled in red.

You may also access LDAP Import from the Contacts Gadget, if preferred.

The screenshot shows the 'Contacts' gadget. At the top, there is a 'Select Contact (or import via LDAP)' dropdown menu, with 'or import via LDAP' circled in red. Below the dropdown is an 'Assign' button. The main area displays a table with columns: Name, Role, Email, and ID. One contact is listed: 'Network Abuse and Policy Observance' with email 'abuse@comcast.net' and ID '#16207'.

Once imported, the LDAP contact will be available to add to the Contacts Gadget and will show in the Users List.

Note: The Scheduler task "LDAP - Sync LDAP Contacts" must be manually created at the desired interval in order to automatically update the LDAP user based on the server information. This task updates imported LDAP users with any changes made on the LDAP server.

Edit or Delete Contact

To Edit or Delete a base contact, click on the contact's name in the contact list to go to its detail view page. From there, click "Edit".

Working with the Contacts Gadget

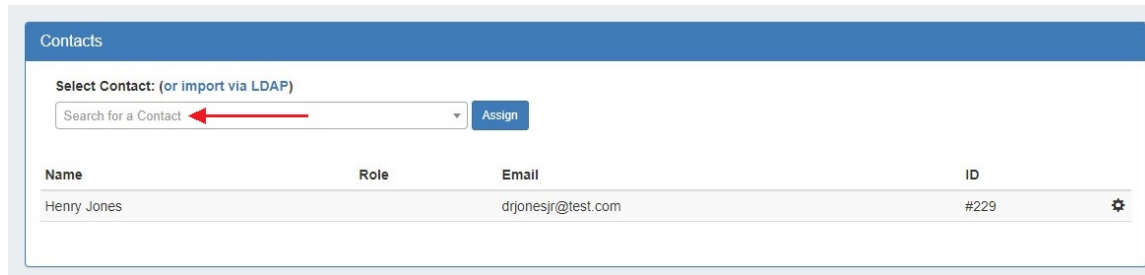

Assigning a Contact to a Resource

Contacts may be assigned to a resource through the [Contacts Gadget](#). To add a gadget to a Resource's Entry page, see [Customizing Sections and Gadgets](#).

Once the Contacts Gadget has been added to the desired section, go to the resource entry page for the resource you wish to assign the contact to, and navigate to the Contacts Gadget.

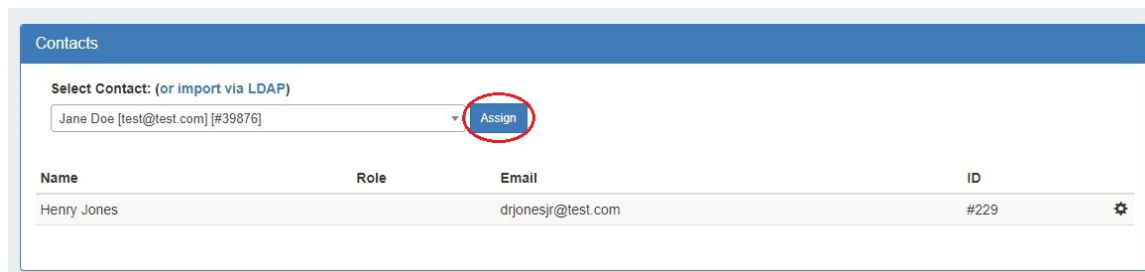

Assign the Contact

In the Contacts Gadget, search for a contact by typing the first few letters of the contact name in the search box, then click on the desired contact.

The screenshot shows the 'Contacts' gadget interface. At the top, there is a section titled 'Select Contact: (or import via LDAP)'. Below this, there is a search box with the placeholder text 'Search for a Contact' and a red arrow pointing to it. To the right of the search box is a blue 'Assign' button. Below the search box, there is a table with the following columns: Name, Role, Email, and ID. The table contains one row with the following data: Name: Henry Jones, Role: (empty), Email: drjonesjr@test.com, ID: #229. To the right of the ID is a gear icon.

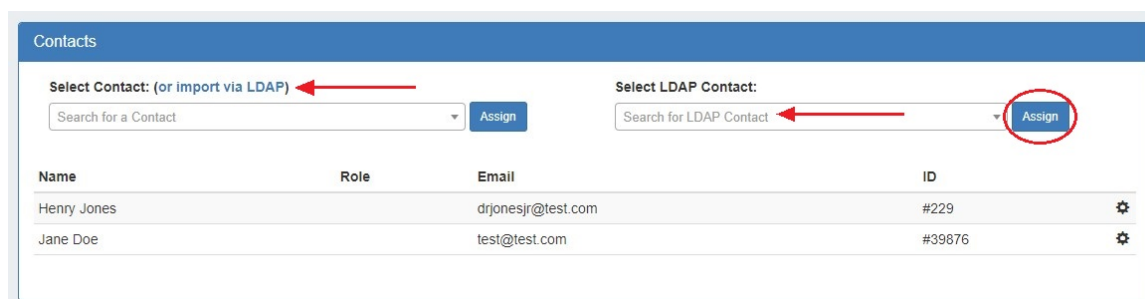

Then hit "Assign".

The screenshot shows the 'Contacts' gadget interface. The search box now contains the text 'Jane Doe [test@test.com] [#39876]'. The 'Assign' button is highlighted with a red circle. The table below the search box remains the same as in the previous screenshot.

The contact will show in the list below.

You can also import and assign a contact via LDAP from the Contacts Gadget. Click on "import via LDAP" and a separate search box will appear. Search for an LDAP contact and hit "Assign".

The screenshot shows the 'Contacts' gadget interface. The 'Select Contact: (or import via LDAP)' section is highlighted with a red arrow. Below it, there is a search box with the placeholder text 'Search for a Contact' and a red arrow pointing to it. To the right of the search box is a blue 'Assign' button. To the right of the 'Assign' button, there is a section titled 'Select LDAP Contact:'. Below this, there is a search box with the placeholder text 'Search for LDAP Contact' and a red arrow pointing to it. To the right of the search box is a blue 'Assign' button, which is highlighted with a red circle. Below the search boxes, there is a table with the following columns: Name, Role, Email, and ID. The table contains two rows with the following data: Name: Henry Jones, Role: (empty), Email: drjonesjr@test.com, ID: #229; Name: Jane Doe, Role: (empty), Email: test@test.com, ID: #39876. To the right of the ID is a gear icon.

The contact will be imported and assigned to the resource. If a contact has already been imported, a notification will appear and the gadget will assign the contact to the resource, but the contact will not be imported again.

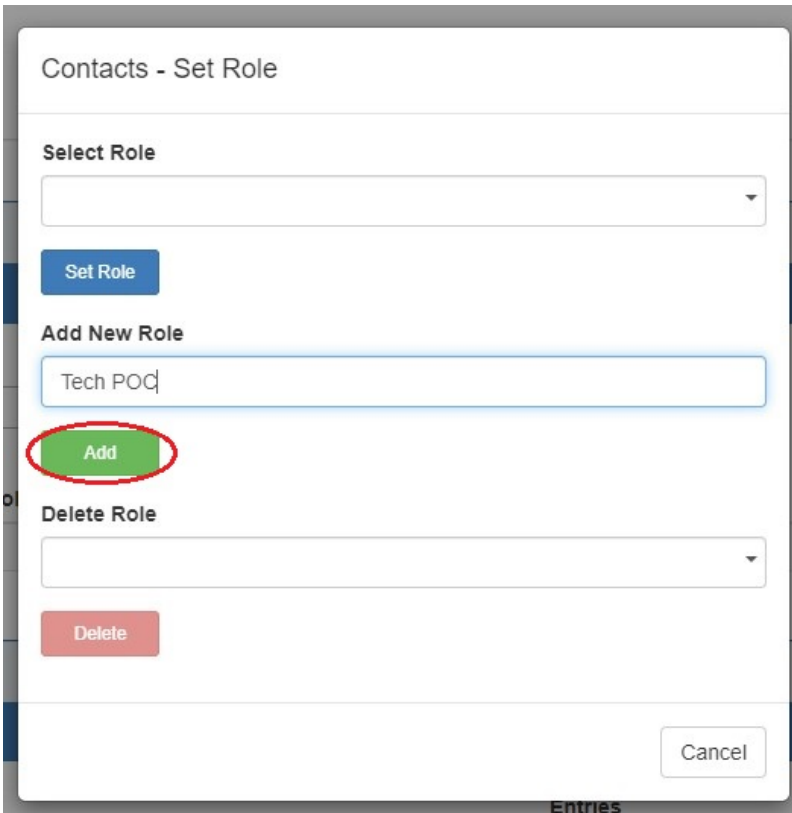

Create a Contact Role

Once a contact has been assigned, you can create and set a role for the contact by clicking on the Action Menu (gear icon).

Then, select "Set Role".

Under the "Add New Role" section, type in the desired role name and click the "Add" button.

Assign a Role to a Contact

Once a contact has been assigned, you can set a role for the contact by clicking on the Action Menu (gear icon).

Then, select "Set Role".

Under the "Select Role" section, choose the desired role from the dropdown list, and click the "Set Role" button.
