The 6connect ProVision log provides detailed information on actions performed in ProVision. The Log is only available to Admin users.

To access the Log, either navigate to the Admin area of ProVision, then click the [Log](#) Tab, or follow an area-specific Log link.

## Log Features

### Filters and search options:

Filter the log list by selecting (or typing) the desired filter value at the top of the Log page, then click on the "Search" button.

Additional options are made visible by clicking on the "More Filters" link below "Results per page".

The following filters and options are available:

## Primary Filters:

**Level:** Under the "Level" dropdown box, select "All Levels", "Emergency", "Alert", "Critical", "Error", "Warning", "Notice", "Info", or "Debug".

### Level

- ✓ All Levels
- Emergency
- Alert
- Critical
- Error
- Warning
- Notice
- Info
- Debug

**Category:** Under the "Category" dropdown box, select "All Categories", "System", "API", "Assistant", "Device", "DHCP", "DNS", "IPAM", "NTP", "Peering", "Reporting", "Resource Linkage", "Resource Holder", "Resource", "User", or "VLAN".

### Category

✓ All Categories

Assistant

Device

DHCP

DNS

IPAM

NTP

Peering

Reporting

Resource Linkage

Resource Holder

Resource

User

VLAN

**Results per page:** In the "Results per page" text box, type the desired number of log entries to see per page. By default, this value is set to 100.

### Results Per Page

100

**Search:** Type a search string, then click the "Search" button. Search terms may be usernames, resource names, task names, resource or task id numbers, IP's, and so on.

| Time                | User             | IP            | Level | Category | Message  |
|---------------------|------------------|---------------|-------|----------|--|
| 2020-06-09 06:35:32 | ops@6connect.com | 95.87.254.225 | Info  | System   | Task "New Task" (127) updated  |
| 2020-06-09 02:00:04 | daemon           | localhost     | Info  | System   | task_id=127 task=New Task action=finished message=Successfully generated GeoIP file at /var/www/html/qa-7.4.0/scheduler/Tasks/../../geoip_feed.csv |

### More Options:

Additional detailed filter and search options are available under the "More Filters" link.

- **Log ID:** Retrieve a specific log entry from its log\_id parameter.
- **IP:** Search by IP of the machine that created the event in the log.
- **Username:** Filter logs by ProVision username, or by "Unknown" user.
- **Time:** Filter log entries by exact time created. Must be in datetime format (2016-08-14 16:41:18).
- **Time Minimum:** The earliest day and time of log entries to show in results. Must be in datetime format (2016-08-14 16:41:18).
- **Time Maximum:** The latest day and time of log entries to show in results. Must be in datetime format (2016-08-14 16:41:18).

#### Tip

Use "Time Minimum" and "Time Maximum" together to specify a specific date / time range, such as one 24 hour period:

## Log Details:

Clicking on the blue arrow on the left side of each log entry expands the entry to show additional details pertaining to that entry.

Not all fields may be populated, and not all log types may have applicable details.

| date_value        | 2020-06-09          |                  |               |      |        |                               |
| address_value     |                     |                  |               |      |        |                               |
| address_end_value |                     |                  |               |      |        |                               |

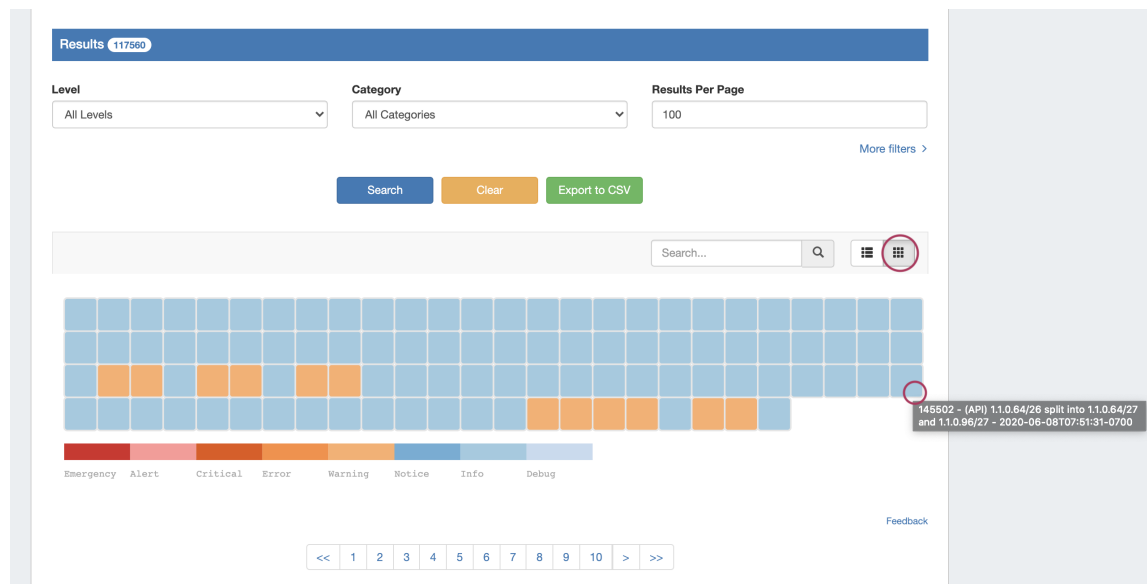

Detail fields may include:

- **id:** The id of the log detail record.
- **log\_id:** The id of the parent log entry (the entry that was clicked to reveal details).
- **type:** Log category value.
- **string\_value:** String details.
- **number\_value:** For resource type log entries, the number\_value is the associated resource id.
- **text\_value:** API details for API type log entries.
- **date\_value:** Day of the log entry.
- **address\_value:** For IPAM type log entries, address\_value is the starting integer value of the IP Block.
- **address\_end\_value:** For IPAM type log entries, address\_end\_value is the ending integer value of the IP Block.

## Log Chart View

To view the graphical chart version of Logs, click the "chart" toggle on the bottom right of the search fields.

Each log event will be displayed as a color-coded box. You may view log details by hovering the mouse arrow over an event box.

## Export Logs

Export the current log search results by clicking the "Export to CSV" button after performing your search.
