Bug Fixes/Improvements

CFR- 96: Improved API return message passing in cases where you cannot split a block to direct assign it.

IM- 1590: After deleting a child resource, ProVision now navigates back to the parent resource's entry page.

IM- 2202: Title on redirect page changed to "6connect ProVision".

IM- 2259: In the Contacts Gadget, resolved a bug where users could erroneously use a single space as a search term.

IM- 2252: Fixed an issue in IPAM Manage - Multi-block edit where the LIR dropdown would not populate unless a single-block edit had been performed first.

IM- 2254: Resolved a bug where a Resource was not selectable when creating a Group.

IM- 2258: Users with permissions to only select resources can now create DHCP servers for those resources.
