# ProVision 4.1.8

The 4.1.8 release is a bug fix release that contains a new feature improvement.

Feature Improvements

IM-1255 - User customizable header and support links. Under Admin->Application Settings, you can now set your own custom header image (note the image size), as well as email and phone number to contact for support.

Bug Fixes

IM-1317 - IPAM Gadget - Region dropdown is blank when editing

IM-1313 - $GENERATE on DNS not producing appropriate PTRs

IM-1310 - Admin-Users - Check User Permissions field no longer working

IM-1306 - Unable to add maintainers to new LIRs

IM-1302 - Can't Smart Assign when using the LIR parameter

IM-1237 - Admin->API page loading very slow even with no data

IM-1229 - RIR Integration missing link to LIR Manager if no LIRs exist

IM-1182 - API - fix request generator to updated resource parameters

IM-1121 - Logging message missing data for outbound contact email
