

ProVision 4.1.15

The 4.1.15 release is a bug fix release that contains a few feature improvements.

Feature Improvements

CFR-76 - Add Configuration setting for submitting changes to RIPE test v. live database

IM-140 (part) - Password management improvements - stored passwords are now stored outside of primary database structure.

Bug Fixes

IM-1395 - DNS - Assign DNS zone drop down displaying incorrect information

IM-1396 - IPAM - SWIP check mark displayed when IP is only assigned

IM-1421 - IPAM - Smart assign producing two log messages (should be one)

IM-1423 - API - Hashed API requests fail if first character of key is 0

IM-1424 - IPAM - Scan loading indicator never goes away
