208.39.104.106

ex: ns1.dns.6connect.net or 216.239.32.10

Default:

Do Not Add to New Zones

Transfer Type:

PowerDNS

Server Type:

Master

Backend Type:

MySQL

SOA:

ns1.dns.6connect.net. hostmaster.6connect.net.

ex: ns1.dns.6connect.net. hostmaster.6connect.net.

Username:

6connect

Password:

.....

DB Username:

6connect

DB Password:

.....

DB Port:

3306

DB Name:

powerdns

Test Config

Update Server

Delete Server

Connected socket to 208.39.104.106:3306 but MySQL connection failed: could not find driver

Bug Fixes

IM-1411 - DNS - Add "Test Config" option for PowerDNS servers in DNS Admin

IM-1430 - IPAM - Direct assign using block parameter throws error

IM-1431 - Setup - configBootstrap allows an empty registration email
